

EXTRA50-RV

APPLICATION

The EXTRA 50 is a keyless quick-action drill chuck for use on hand-held use on hand-held power tools. With a length of just 51 mm length, it is the shortest professional drill chuck on the market. The compact design improves maneuverability and accessibility in tight spaces for the user. Added to this is the lower weight, which improves the top-heaviness of the entire machine and thus reduces wrist fatigue during prolonged work. Suitable for mains drills and cordless machines with / without spindle stop up to a maximum torque of 80 Nm and up to 1000 watts of power.

TYPE

Impact-resistant quick-action drill chuck with radial locking and metal sleeve. With through-hole for use of a locking screw.

CUSTOMER BENEFITS

- ⌚ Easy clamping and locking with one manual operation for maximum user-friendliness
- ⌚ Radial locking device to prevent release of the drill bit during clockwise and counterclockwise rotation
- ⌚ Impact-resistant for universal use

TECHNICAL FEATURES

- With carbide inserts in the clamping jaws
- Equipped with collision protector by freely rotating protection disc

A01 Keyless drill chuck EXTRA-RV 50, size 13, mount 1/2"-20, metal
